TO WHOM IT MAY CONCERNS

Dear Sirs,

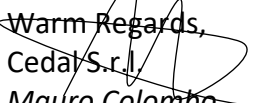

Contrary to what was reported by Mr. Bruno Ceraso, procurator of Cedal Equipment S.r.l. in the letter sent to you, the license agreement, as far as it is concerned here, has not in any way been resolved by fact attributable to Cedal S.r.l. but by the **behavior of** Cedal Equipment S.r.l.

We limit ourselves to highlighting how the Court of Appeal of Turin herewith attached confirmed the rulings contained in the sentence issued on 5 July 2014 by the Court of Turin, with which, inter alia, **it was inhibited and banned by Cedal Equipment S.r.l. to continue in:**

"... **production, marketing, use, marketing, sale and import** of the Bonding 130 and **Pinless Single Drawer 211** machines **incorporating the magnetic induction welding system**" and was **also ordered** from Cedal Equipment S.r.l. the "**withdrawal** from the Bonding 130 and Pinless Single Drawer 211".

Consequently, anyone who uses this method, regardless of whether the head is double, single or any other shape violate the IP rights.

Certain of having definitively clarified our position.

Warm Regards,
Cedal S.r.l.
Mauro Colombo
Legal Representative
